

## Delta Engineering – Warehouse worker

### Warehouse worker

As a warehouse worker at Delta Engineering, your responsibilities will include the following tasks:

- You will handle the receipt of goods.
- You will also be responsible for dispatching spare parts and machinery. In doing so, you will ensure that our (large) machines are packed correctly and securely to guarantee safe transport.
- You will ensure accurate order picking for our internal work orders.
- Thanks to your efficient stock management within our supply chain, you will help support the logistics chain.
- You will be responsible for day-to-day stock management.

### Your profile

- You have a sense of order and tidiness and are meticulous.
- You are someone who works independently and is not afraid to take the initiative.
- You are sociable, have a hands-on approach and work well with your colleagues.
- A good basic knowledge of English (spoken and written) is an advantage.
- A good basic understanding of technical matters is an advantage.
- Experience in warehouse management or another logistics role is an advantage.
- Experience with warehouse management software packages is an advantage.
- You should ideally hold a forklift/overhead crane certificate.
- You have knowledge of MS Office and are proficient with a PC (warehouse management via an ERP package).

### Our offer

- Een werkzekere, afwisselende job binnen een jong, groeiend bedrijf en een enthousiast team. Je werkt voor een financieel gezond bedrijf met een toonaangevende naam en een duidelijke toekomstvisie.
- Je mag rekenen op permanente vorming.
- Je verloning staat in verhouding tot jouw profiel en ervaring.
